

# Go Beyond The Dairy Industry Sustainability Common Practices

Every major dairy company follows these steps.

**Are you keeping up with the industry's common practices?**

**Improve energy efficiency**, by using tech like LED lights and efficient heating in production.

**Switch to cleaner energy sources** to cut carbon emissions.

**Improve supply chains** by combining production and logistics. locations, boosting tanker efficiency, and promoting renewable energy on member farms

**Encourage staff to adopt energy-efficient habits** for a sustainable culture.

**Explore new tech** like manure-based biogas and breakthroughs in reducing on-farm emissions.

*Follow the trailblazers' example and go the extra mile by:*

- 1. Going beyond the greenwashing**—build a Sustainability Intelligence team (both internally and externally), focus on insetting emissions, and trace >50% of sustainable palm oil.
- 2. Innovating in the plant-based market to cut carbon emissions**—invest in breakthroughs for better price, texture, and taste.
- 3. Amplifying your impact on Scope 3 emissions.** Forge up- and downstream links for a transparent, sustainable food chain.

Invest in Sustainability Intelligence  
today to lead the way tomorrow.
